

West Country Glass which will be using Kommerling Kodimelt IG in future production.

Kommerling to supply Kodimelt IG to Cornwall Glass

*** Third manufacturing site to benefit from Kommerling products**

Kommerling UK, the leading provider of sealants and adhesives, has increased its business with Cornwall Glass, having agreed to supply the company with its Kodimelt IG product. The product will be used in the production of insulated glass units at West Country Glass in Saltash, the third of Cornwall Glass' production centres.

Phil Turley, Business Manager, Glass Products at Kommerling UK said; "We have had a long and productive relationship with Cornwall Glass that has developed over the last ten years. We are delighted to be able to build on this with this latest agreement that makes a significant contribution to the level of business we do with the company and we look forward to Cornwall Glass' continued success."

"Kommerling has impressed us from the start and their support and understanding gave us the confidence to change over from our previous supplier. The relationship that we hold with them is long lasting and we are delighted with the change;" Angus Herdman, Sales Director at Cornwall Glass.

Kodimelt is a single component product, based on butyl, and is a popular choice with many insulated glass producers. It is proven to have very low gas loss rates, in line with EN1279-3. It is regularly used on automated sealing machines and is ideally suited for use in the production of a wide range of shaped and stepped units, and triple pane units.
