

Kommerling's Korapop 257. High res jpeg available on request

**Kommerling responds to market demand with the introduction of a new, improved adhesives for automotive and bodywork sectors**

- **Korapop 257, a UV stable, moisture resistant adhesive and sealant**

Kommerling UK has announced that its new adhesive, Korapop 257 is now available to the UK market following a robust testing procedure carried out in collaboration with one of the country's leading truck and trailer manufacturers. The one-component sealant has been developed in response to market demand for improved sealant performance in the areas of weather and moisture resistance.

Ian Little, Key Account Manager, Engineering Adhesives EIMEA, for Kommerling said; "The majority of caravans, trailers and vans are constructed with a predominantly white body. As these vehicles travel along the roads tiny particles of dust and dirt are trapped by the surface tension of the sealants on the bodywork joints. However, Korapop 257 has been developed to deliver a high-performance sealant that greatly reduces the retention and collection of dirt particles on the vehicle bodywork."

The sealant is available in cartridge and sachet format and is solvent free. It is suitable for use with a variety of substrates including galvanised steel, aluminium alloys, duro and thermoplastics, glass, wood and other coated surfaces. Customers seeking more information or wishing to order the product should contact Kommerling's UK distributor, Albert Jagger [www.albert-jagger.co.uk](http://www.albert-jagger.co.uk)

Korapop 257 is a white coloured, silane modified polymer that can also be used in industrial assembly and construction due to its high cold and heat resistance and excellent moisture and weather resistance.

## **Background Kommerling**

KÖMMERLING Chemische Fabrik GmbH, headquartered in Pirmasens Germany, is a leading international manufacturer of high-quality adhesives and sealants. Since its foundation in the year 1897, KÖMMERLING has time and again pioneered the development of innovative technologies for modern adhesives and sealants.

We are passionate about innovative solutions for improving energy efficiency. Together with our customers we analyse their processes to then optimise these with jointly elaborated solutions. We replace mechanical fasteners, make products lighter, more durable and less noisy. This has made KÖMMERLING a technology leader in many adhesive and sealant applications. With our excellent product quality and worldwide service, we have evolved into a widely-recognised systems supplier for the Glass, Transport, Construction, Industrial Assembly and Renewable Energy industries.

KÖMMERLING offers the most complete product range for the glass industry – and hence solutions for nearly every application from a single source. Our adhesives and sealants fulfil the highest requirements of international certification standards. In addition, they are tested according to even more stringent internal criteria.
