

Haws strengthens its bond with Korapop 235

High res jpeg images available on request.

With a spike in popularity during lockdown, more people are benefiting physically and mentally from home gardening, transforming the industry. Established in 1886, Haws is the world's oldest manufacturer of watering cans. Expertly handcrafted and built to last from their workshop in Smethwick, West Midlands, Haws products are as enduring as their reputation.

With an expansive range, Haws offer unique indoor and outdoor watering cans, in both metal and plastic with a diverse range of colours and finishes. Each can is handcrafted, leaving no two cans the same. The company is dedicated to protecting the environment, from recyclable and compostable packaging through to product design and wanted to find a suitable adhesive for their application that met their requirements for sustainability and quality.

Kommerling partner, Albert Jagger recommended Korapop 235, a one component sealant and adhesive to ensure durability. Mark Tudor, business development manager, said; "Choosing to use Korapop 235 was an important part of the design

for Haws. Korapop 235 is a quality, easy to work with sealant, providing an exceptional bond to ensure a watertight seal with good resistance to humidity and weathering. These attributes help to maximise product longevity, with Haws watering cans designed to last – helping avoid the need for landfill."

Kommerling UK Ltd has a range of high-performance adhesive solutions and bonding agents to enhance and add value. Albert Jagger's partnership with Kommerling UK Ltd sees shared technical excellence in product development, ensuring first class support across a range of sectors including engineering, industrial and marine applications.

About H.B. Fuller | KÖMMERLING

Since 2017, Kömmerling Chemische Fabrik GmbH, operating as H.B. Fuller | KÖMMERLING, has been part of the H.B. Fuller US Adhesives Group. The world's largest supplier of adhesives and sealants for insulating glass applications therefore has significant expertise in this area, which is continuously being advanced at H.B.
